GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. After the formation of the California Water Commission back on December 19, 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

SUBJECT: INFORMATION FOR UPDATING THE DIVISION OF WATER RIGHTS
DATABASE

According to the Division of Water Rights' (Division) database, the Department of Fish and Game (Department) has about 100 appropriative water rights and Statements of Water Diversion and Use on file with this agency. The attached listing (Name Index) indicates the various water rights held or claimed by the Department and the contact person or entity presently receiving correspondences and annual reports that related to these diversions.

It was noticed that the rights are not all assigned to a specific or primary mailing address with the Department. We suggest, if appropriate, that the Department designate the primary right holder's mailing address for all its rights and claims as:

Department of Fish and Game
1416 Ninth Street, 12th Floor
Sacramento, CA 95814

It is also recommended that the attached list of designated Regional Offices and addresses be updated so we can correct our database. If the Department elects to designate a specific person or regional office to handle all matters pertaining to a particular water right or project, please provide us with the contact name, mailing address and telephone number.

A number of your regional offices have expressed a concern associating the water right identification number with specific projects. These offices asked if we could somehow identify the project name on our correspondence and database. Presently we are considering your suggestions and ask that the Department provide us with any project name that corresponds to a specific water right(s).

The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

SUBJECT: INFORMATION FOR UPDATING THE DIVISION OF WATER RIGHTS
DATABASE

According to the Division of Water Rights' (Division) database, the Department of Fish and Game (Department) has about 100 appropriative water rights and Statements of Water Diversion and Use on file with this agency. The attached listing (Name Index) indicates the various water rights held or claimed by the Department and the contact person or entity presently receiving correspondences and annual reports that related to these diversions.

It was noticed that the rights are not all assigned to a specific or primary mailing address with the Department. We suggest, if appropriate, that the Department designate the primary right holder's mailing address for all its rights and claims as:

Department of Fish and Game
1416 Ninth Street, 12th Floor
Sacramento, CA 95814

It is also recommended that the attached list of designated Regional Offices and addresses be updated so we can correct our database. If the Department elects to designate a specific person or regional office to handle all matters pertaining to a particular water right or project, please provide us with the contact name, mailing address and telephone number.

A number of your regional offices have expressed a concern associating the water right identification number with specific projects. These offices asked if we could somehow identify the project name on our correspondence and database. Presently we are considering your suggestions and ask that the Department provide us with any project name that corresponds to a specific water right(s).

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:
